APPENDIX O.

Acc. No. 1722
Dt. 16/5/07

Tables of annual instalments of equated repayments of Taccavi Loans and their distribution between interest and principal.

(See Chapter VIII, para. 203-A of the Bengal Treasury Manual.)

1. The tables have been prepared according to the draft rules regarding the repayment of Taccavi Loans attached to the Government of India Circular No. 6—260-1, dated 14th May 1907. The Government of Bengal decided in their letter No. 2685-T. R., dated 31st October 1907, that repayment should commence after either 1, $1\frac{1}{2}$ or $2\frac{1}{2}$ years from the date of advance. In the meantime, no charge (*e. g.*, for interest) would be realised. The interest for the period is added to the principal in the calculation of equated payments.

2. The rate of interest has been taken at $6\frac{1}{4}\%$ per annum. Calculations have been made for the amounts of Rs 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 20, 30, 40, 50, 60, 70, 80, 90 and 100, the period of the loans being 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 15 and 20 years. For any amount intermediate between the tens of rupees, an instalment of repayment may be easily calculated and split up into interest and principal by simple addition of the figures given in the Tables corresponding to the nearest multiple of ten rupees and the remainder.

3. Owing to the fact that fractions of an anna have been neglected in the calculations, and that in splitting up the instalments into interest and principal, the amount actually advanced has been taken to be the principal to be repaid, although the interest for the moratorium period has been added on thereto in calculating the instalments, as explained in para. 1, negative figures have sometimes appeared. These negative quantities should be debited or credited to "Interest on Taccavi" by per contra credit or debit to "Principal". This point should be carefully noted.

[For example, take the case of a loan of Rs 50 repayable in 20 years, the period of grace being $1\frac{1}{2}$ years. The annual instalment is Rs 4-9-0 (*vide* page 47 of the Tables). When the instalment for the 1st year is realised, it should be credited to Interest. The sum of Rs 0-3-0 should then be debited to Principal by per contra credit to "Interests on Taccavi". Again when the instalment for the 20th year is realised, it should be credited to "Principal". The sum of Rs 0-9-0 should then be debited to "Interests on Taccavi" by per contra credit to Principal.]

J. C. E. BRANSON,

Accountant-General, Bengal.
